Rakesh Narlagiri

Full-stack Python And GenAI Developer

rakeshnarlagiri8@gmail.com 8125881214 Hyderabad, India 507001

linkedin.com/in/rakesh-narlagiri-89510a300

Summary

Generative AI engineer and full-stack Python developer with expertise in designing scalable, high-performance AI systems. Delivered production-grade solutions that reduced latency by up to 90% and built advanced applications such as chatbots, voice bots, and autonomous workflows to improve customer engagement and automate complex processes. Strong background in LLMs, backend engineering, and real-time AI architectures.

Experience

4 years as PYTHON DEVELOPER AND GENERATIVE AI SOLUTIONS, 08/2021 – till date
In10s Technologies Limited Hyderabad, India

- **AI Backend & API Development** Built scalable AI-powered backend systems by developing RESTful APIs using FastAPI, reducing latency by up to 90%, and enabling intelligent features such as prompt-based query generation, recommendation systems, and workflow automation.
- **Dynamic Content Generation Platform** Built scalable multi-channel content generation platforms (Web, WhatsApp, SMS, Email) for banking and insurance clients using FastAPI, enabling AI-powered template generation, tone customization, word-limit control, variable substitution, multilingual support, and personalized content delivery.
- **Conversational AI & Enterprise Chatbots** Developed intelligent chatbot solutions for banking and insurance domains using dynamic conversation flows, static knowledge repositories, API-driven actions, and LLM-powered question answering. Integrated RAG pipelines with FAISS, intent recognition, entity extraction, context-aware memory, and external API calls to deliver personalized and contextually relevant responses.
- **LLM-Based Knowledge Assistants** Designed and deployed AI conversational systems using OpenAI, LLaMA, Qwen, and Gemma models, implementing retrieval-augmented generation (RAG), semantic search, document ingestion pipelines, and enterprise knowledge retrieval workflows.
- **Voice AI & IVR Automation** Engineered real-time voice bots by integrating ElevenLabs and Sarvam AI for Text-to-Speech (TTS) and Speech-to-Text (STT) capabilities, combined with LLMs for response generation, enabling multilingual, low-latency, IVR-style conversational experiences.
- **Computer Vision Solutions** Collaborated on AI-driven computer vision projects including face detection, prohibited-content detection, and photovoltaic (PV) defect detection, improving model performance and operational efficiency.

Education

JNTUH University - KHAMMAM, B.tech 01/2020
Khammam, India

Skills

Backend Development
python , Django, Flask, FastAPI, RESTful APIs, Microservices Architecture, Async Programming, WebSockets, Streaming APIs, java, streamlit.

AI / Machine Learning & Generative AI
Generative AI, Prompt Engineering, Retrieval-Augmented Generation (RAG), Natural Language Processing (NLP), Conversational AI, LLM Integration (OpenAI, LLaMA, Qwen, Gemma), Vector Databases (FAISS), Embeddings, Semantic Search, PyTorch, Transformers

Voice & Speech AI
Speech-to-Text (STT), Text-to-Speech (TTS), Real-time Audio Streaming, Voice Bot Development, IVR Systems, Audio Buffering & Latency Optimization

Tools & Platforms
Jupyter Notebook, Google Colab, Git, Docker

Frontend Development
HTML, Bootstrap, React

LLM Frameworks & Orchestration
LangChain, langGraph, langSmith, LlamaIndex, transformers, hugging face, scikit- learn tensorflow.

Data & Analytics
NumPy, Pandas, Matplotlib, SciPy, Data Analysis

Advanced Concepts
Multi-tenant AI Systems, Dynamic Template Generation, Query Generation & Optimization using LLMs

Certifications

- AWS Cloud Technical Essentials
- Cloud Virtualization
- Containers and APIs
- English Communication for Tech Professionals
- Web Applications and Command-Line Tools for Data Engineering
- Introduction to Software Engineering
- Git and GitHub
- Python Application with Flask
- FastAPI

Languages

Telugu — Native | **English** — Proficient | **Hindi** — Proficient
